

SUPPLEMENTARY MACHINE SERVICE BULLETIN #48-A

SUBJECT: Price List for "3" Series Parts
and Assemblies

DATE: September 10, 1928

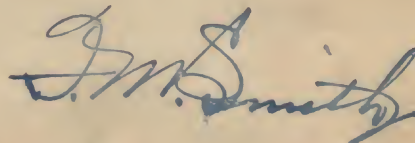

TO ALL OFFICES:

In the supplement to Machine Service Bulletin #40 which was issued on August 16, 1928 containing information concerning the prices of Full Automatic parts and assemblies, there was mentioned the fact that the price list of "3" series parts and assemblies would be included. This was later found, however, not to be practical and it was decided not to include this information at that time.

We are attaching to this Bulletin a parts and assembly price list of material for "3" series machines. It will be noted that these parts are illustrated on Plate 4, of Machine Service Bulletin #48.

This sheet is to supersede the parts and assembly list already forming a part of the above-mentioned Bulletin, and that sheet is to be destroyed.

Be sure to file this supplement together with the original Bulletin for ready reference. It is also suggested that a notation be made on the supplement to Machine Service Bulletin #40, mentioned in the first paragraph above, that the information referred to concerning "3" series parts and assemblies, will be found herein. This will eliminate doubt and confusion when referring to these Bulletins.

FMS:W

General Service Manager

PART AND ASSEMBLY LIST OF K MODEL
"3" SERIES MACHINES
(SHOWN ON PLATE 4, BULLETIN 48)

Part No.	Name	Quantity Per Machine		Price
		16	20
